

Evotec is a leader in the discovery and development of novel small molecule drugs. It has built substantial drug discovery expertise and an industrialized platform that can drive new innovative small molecule compounds into the clinic. The company offers services and alliances based on its state-of-the-art technology platform and a broad range of integrated capabilities spanning the drug discovery process.

We are looking for a highly motivated

Research Associate (m/w)

to join our Compound Management team and lead a team of research assistants planning and fulfilling dry and solution-based compound sample requests and supporting HTS screening for our customers. This will include different storage systems (plate, tube and vial based). For compound preparation you are utilizing and programming automated compound handling systems. You will oversee routine operation of laboratory robotics while interfacing with software tools for inventory management. In addition you will execute process quality control routines and troubleshoot compound management equipment, and software to ensure the highest the highest level of reliability and precision.

To qualify, you must have a degree (MSc; Diploma) in chemistry, biotechnology or equivalent with relevant industrial experience in a compound management or automation group. A thorough hands-on knowledge of activities related to many compound management processes, with practical understanding of inventory management, solution production, quality control methodology and logistics management is highly requested. Expertise in programming and running of automated pipetting systems is preferred. Concise analytical reasoning coupled to a service-driven, pragmatic yet flexible and creative troubleshooting approach is highly beneficial. Good personal and communication skills and the ability to work well within a team is a must, along with the ability to be responsive to our research partners.

In return, Evotec offers the chance to expand and develop your career in a vigorous and exciting professional environment promoted by an open culture and a spirit of community.

If this sounds like the role you have been looking for, please e-mail your CV as soon as possible to humanresources-de@evotec.com or alternatively post your full, up-to-date resume directly to Evotec AG • Human Resources • Essener Bogen 7 • 22419 Hamburg • Germany.
