

DeveloGen AG, a subsidiary of Evotec AG, is a biopharmaceutical company engaged in the discovery and development of novel therapeutics for the treatment of metabolic and endocrine diseases.

To enrich and expand our expertise at our site in Goettingen, we do have an exciting opportunity for

### **Scientists (m/f) in Regenerative Medicine Research**

Utilising your background and expertise you will participate in ongoing research projects and establish in vivo models with a particular focus on kidney –related disorders. This will include the independent experimental design, execution and analysis of experiments as well as mode of action studies on novel drug targets and/or biologicals. In the longer term, we expect you to manage research collaborations with our clients, thereby coordinating the various functions involved in drug discovery.

To qualify, you must have a PhD in biological sciences and postdoctoral experience in the area of regenerative biology. Practical experience with in vitro and in vivo applications in the fields of chronic or acute kidney disease is required. Particular emphasis is given to technical proficiency and scientific creativity in applying state-of-the-art principles and technologies. The ability to work comfortably in a matrix environment with the initiative to actively communicate and collaborate with all levels of the organization would make you an ideal candidate. Project management experience in drug discovery is considered favourably.

In return, DeveloGen offers the chance to expand and develop your career in a vigorous and exciting professional environment promoted by an open culture and a spirit of community.

You are invited to ideally e-mail to [humanresources-de@evotec.com](mailto:humanresources-de@evotec.com) or alternatively post your full, up-to-date resume directly to Evotec AG • Human Resources • Schnackenburgallee 114 • 22525 Hamburg • Germany.
