

EVOTEC, BOEHRINGER INGELHEIM, AND BIOMÉRIEUX LAUNCH AUROBAC, A JOINT VENTURE TO FIGHT ANTIMICROBIAL RESISTANCE

Germany and France, 06. July 2022:

Evotec SE (Frankfurt Stock Exchange: EVT, MDAX/TecDAX, ISIN: DE0005664809; NASDAQ: EVO), Boehringer Ingelheim, a leading research-driven biopharmaceutical company, and bioMérieux, a world leader in *in vitro* diagnostics, announced today that they have formed a joint venture to create the next generation of antimicrobials along with actionable diagnostics to fight Antimicrobial Resistance (AMR).

The resulting company, Aurobac Therapeutics SAS, will combine the best-of-best capabilities of the three founding companies towards developing a new precision medicine approach, from diagnosis to cure. The aspiration is to succeed in the fight against AMR, which is a major public health threat. Having routine surgery such as caesarean sections or hip replacements may become life threatening, and complications from common diseases such as diabetes and injuries or cuts will become harder to manage because of AMR.

Werner Lanthaler, CEO of Evotec, said: “The grim prospect of a post-antibiotic era has many causes but only one solution: The development of new, targeted, and effective antimicrobial therapies. We are excited to launch Aurobac together with our partners at Boehringer Ingelheim and bioMérieux, to combine our complementary strengths. By leveraging Evotec’s multimodality approach to infectious diseases, we are confident that Aurobac will be able to generate much-needed progress to tackle the global challenge of AMR”.

“The rise of antibiotic-resistant infections – also called antimicrobial resistance, or AMR – is indeed a looming global crisis,” **added Michel Pairet, Head of Boehringer Ingelheim’s Innovation unit and Member of the Board of Managing Directors.** “Antibiotic resistance kills about 1.27 million people globally every year¹ and it has been estimated that by 2050, as many as 10 million worldwide deaths could result from AMR², making it potentially deadlier than cancer.”

“bioMérieux has a strong expertise in antimicrobial resistance. We supply the most comprehensive integrated diagnostic solutions to support an appropriate use of antibiotics (antimicrobial stewardship)”, **said Alexandre Mérieux, bioMérieux Chairman and CEO**. “Our role within the joint venture is to develop and commercialize diagnostic tests, including Companion Diagnostics, which deliver rapid, reliable and actionable results. This participation in Aurobac is perfectly aligned with bioMérieux’ full commitment to sustain antibiotic efficacy for future generations”.

Aurobac will work to shift the strategy related to antibiotic treatment regimens, which at the moment leans heavily on empirical approaches using broad-spectrum and unfocused medicines. The goal is to turn this into a precision approach, using new highly effective and targeted modalities, combined with rapid and actionable diagnostics to quickly identify pathogens and their resistance patterns, and supported by new economic models.

Funded by Boehringer Ingelheim as lead investor with € 30 m and by Evotec and bioMérieux with € 5 m each, the € 40 m joint venture, which has its headquarters in Lyon (France), combines the world leading expertise of Evotec, one of the most active research companies in infectious diseases, with bioMérieux’s market-leading expertise in infectious disease diagnostics and with Boehringer Ingelheim’s broad drug discovery and significant clinical development capabilities.

Three partners committed to combat AMR

Evotec has built a world-leading platform to tackle infectious diseases. With a more than 200-strong anti-infective discovery team, the company has proven experience on multiple agent classes. On top of the company’s own pre-competitive pandemic preparedness and rapid response technology platform (“PRROTECT”), Evotec leverages its infectious disease capabilities with many industry, academic and non-profit partners and is active in a variety of networks such as the AMR Accelerator that is part of the EU’s Innovative Medicines Initiative (“IMI”).

Boehringer Ingelheim’s participation in Aurobac is part of a wider so-called pandemic preparedness initiative, which includes a € 50 m investment in the AMR action fund by Boehringer Ingelheim. Boehringer Ingelheim Venture Fund has committed to invest in up to 12 AMR infection companies.

bioMérieux has over 55 years of diagnostics expertise with more than 75% of its research and development budget focused on antimicrobial resistance. Moreover, 80% of its turnover is related to the fight against AMR through a complete diagnostic

solution facilitating antibiotic therapy decision-making, including antibiotic initiation, optimization, and discontinuation.

ABOUT BOEHRINGER INGELHEIM

Boehringer Ingelheim is working on breakthrough therapies that transform lives, today and for generations to come. As a leading research-driven biopharmaceutical company, the company creates value through innovation in areas of high unmet medical need. Founded in 1885 and family-owned ever since, Boehringer Ingelheim takes a long-term perspective. More than 52,000 employees serve over 130 markets in the three business areas, Human Pharma, Animal Health, and Biopharmaceutical Contract Manufacturing. Learn more at www.boehringer-ingelheim.com

ABOUT BIOMÉRIEUX

Pioneering Diagnostics

A world leader in the field of in vitro diagnostics since 1963, bioMérieux is present in 44 countries and serves more than 160 countries with the support of a large network of distributors. In 2021, revenues reached €3.4 billion, with over 90% of sales outside of France. bioMérieux provides diagnostic solutions (systems, reagents, software and services) which determine the source of disease and contamination to improve patient health and ensure consumer safety. Its products are mainly used for diagnosing infectious diseases. They are also used for detecting microorganisms in agri-food, pharmaceutical and cosmetic products.

ABOUT EVOTEC SE

Evotec is a life science company with a unique business model that delivers on its mission to discover and develop highly effective therapeutics and make them available to the patients. The Company's multimodality platform comprises a unique combination of innovative technologies, data and science for the discovery, development, and production of first-in-class and best-in-class pharmaceutical products. Evotec leverages this "Data-driven R&D Autobahn to Cures" for proprietary projects and within a network of partners including all Top 20 Pharma and over 800 biotechnology companies, academic institutions, as well as other healthcare stakeholders. Evotec has strategic activities in a broad range of currently underserved therapeutic areas, including e.g. neurology, oncology, as well as metabolic and infectious diseases. Within these areas of expertise, Evotec aims to create the world-leading co-owned pipeline for innovative therapeutics and has to-date established a portfolio of more than 200 proprietary and co-owned R&D projects from early discovery to clinical development. Evotec operates globally with more than 4,200 highly qualified people. The Company's 16 sites offer highly synergistic technologies and services and operate as complementary clusters of excellence. For additional information please go to www.evotec.com and follow us on Twitter [@Evotec](https://twitter.com/Evotec) and [LinkedIn](https://www.linkedin.com/company/evotec).

FORWARD-LOOKING STATEMENTS

This announcement contains forward-looking statements concerning future events, including the proposed offering and listing of Evotec's securities. Words such as "anticipate," "believe," "could," "estimate," "expect," "intend," "may," "might," "plan," "potential," "should," "target," "would" and variations of such words and similar expressions are intended to identify forward-looking statements. Such statements include comments regarding Evotec's expectations for revenues, Group EBITDA and unpartnered R&D expenses. These forward-looking statements are based on the information available to, and the expectations and assumptions deemed reasonable by Evotec at the

time these statements were made. No assurance can be given that such expectations will prove to have been correct. These statements involve known and unknown risks and are based upon a number of assumptions and estimates, which are inherently subject to significant uncertainties and contingencies, many of which are beyond the control of Evotec. Evotec expressly disclaims any obligations or undertaking to release publicly any updates or revisions to any forward-looking statements contained herein to reflect any change in Evotec's expectations with respect thereto or any change in events, conditions or circumstances on which any statement is based.
