## **Evotec Enters into Integrated Drug Discovery Alliance with Genentech**

**Hamburg, Germany – 10 May 2010:** Evotec AG (Frankfurt Stock Exchange: EVT, TecDAX) today announced that it has entered into a multi-year integrated drug discovery alliance with Genentech Inc., a wholly owned member of the Roche Group (SIX: RO, ROG; OTCQX: RHHBY), to discover novel small molecule therapeutics.

Evotec will apply its integrated and innovative drug discovery platform in combination with its extensive disease biology expertise against targets nominated by Genentech. This will include assay development and high throughput screening, medicinal chemistry and structural biology. The aim of the collaboration is to deliver high quality leads and development candidates to support Genentech's research efforts.

Further commercial details were not released.

**Dr Werner Lanthaler, Chief Executive Officer of Evotec, commented:**

"We are proud that Genentech, one of the premier biopharmaceutical companies worldwide, has selected Evotec's scientists and innovative drug discovery platform to support their research efforts. We look forward to working closely with Genentech's scientists and achieving success together."

### **About Evotec AG**

Evotec is a leader in the discovery and development of novel small molecule drugs with operational sites in Europe and Asia. The Company has built substantial drug discovery expertise and an industrialised platform that can drive new innovative small molecule compounds into the clinic. In addition, Evotec has built a deep internal knowledge base in the treatment of diseases related to neuroscience, pain, oncology and inflammation. Leveraging these skills and expertise the Company intends to develop best-in-class differentiated therapeutics and deliver superior science-driven discovery alliances with pharmaceutical and biotechnology companies. Evotec has long-term discovery alliances with partners including Boehringer Ingelheim, CHDI, Novartis, Ono Pharmaceutical and Roche. Evotec has product candidates in clinical development and a series of preclinical compounds and development partnerships, including for example a strategic alliance with Roche for the EVT 100 compound family, subtype selective NMDA receptor antagonists for use in treatment-resistant depression. For additional information please go to [www.evotec.com](http://www.evotec.com).

### **About Genentech**

Founded more than 30 years ago, Genentech is a leading biotechnology company that discovers, develops, manufactures and commercializes medicines for patients

with serious or life-threatening medical conditions. The company, a wholly owned member of the Roche Group, has headquarters in South San Francisco, California. For additional information about the company, please visit [www.gene.com](http://www.gene.com).

**Forward-looking statements**

*Information set forth in this press release contains forward-looking statements, which involve a number of risks and uncertainties. Such forward-looking statements include, but are not limited to, statements about our financial outlook for 2010 and beyond; our expectation that our current cash, cash equivalents, investments, and operating revenues will be sufficient to fund our planned activities beyond 2012, and our belief that we are on course to profitability and sustainability by 2012; our expectations regarding the growth of the pharmaceutical outsourcing drug discovery market, the opportunities such growth will provide us, and our ability to take advantage of such market developments and become a leader in this industry in the coming years; our expectations regarding the impacts, and anticipated timing of such impacts, of the “Evotec 2012 – Action Plan to Focus and Grow”; our expectation that our reentry into the German technology TecDAX in 2009 will increase liquidity for our shareholders and that our voluntary delisting from NASDAQ and anticipated de-registration with the SEC will streamline our activities and focus the liquidity of Evotec’s stock on one trading platform; our expectations regarding the impact that the recent global financial crisis will have on our company; our expectations and assumptions concerning regulatory, clinical, and business strategies, the progress of our clinical development programmes and timing of the results of our clinical trials, strategic collaborations, and management’s plans, objectives and strategies. These statements are neither promises nor guarantees, but are subject to a variety of risks and uncertainties, many of which are beyond our control, and which could cause actual results to differ materially from those contemplated in these forward-looking statements. In particular, the risks and uncertainties include, among other things: risks that we may be unable to achieve the anticipated benefits of our revised business focus, restructuring, and cost containment measures or recognise the results of such measures within the expected timeframes; risks that we will not achieve the anticipated benefits of our collaborations, partnerships and acquisitions in the timeframes expected, or at all; the risk that we will not achieve the anticipated benefits of our voluntarily delisting from NASDAQ and anticipated de-registration from the SEC; risks that product candidates may fail in the clinic or may not be successfully marketed or manufactured; risks relating to our ability to advance the development of product candidates currently in the pipeline or in clinical trials; our inability to further identify, develop and achieve commercial success for new products and technologies; the risk that competing products may be more successful; our inability to interest potential partners in our technologies and products; our inability to achieve commercial success for our products and technologies; our inability to protect our intellectual property and the cost of enforcing or defending our intellectual property rights; our failure to comply with regulations relating to our products and product candidates, including FDA requirements; the risk that the FDA may interpret the results of our studies differently than we have; the risk that clinical trials may not result in marketable products; the risk that we may be unable to successfully secure regulatory approval of and market our drug candidates; risks of new, changing and competitive technologies and regulations in the U.S. and internationally; general worldwide economic conditions and related uncertainties; future legislative, regulatory, or tax changes as well as other economic, business and/or competitive factors; and the effect of exchange rate fluctuations on our international operations. The list of risks above is not ex-*
