Evotec receives clinical milestone as part of its discovery alliance with Boehringer Ingelheim

Hamburg, Germany – 30 September 2013: Evotec AG (Frankfurt Stock Exchange: EVT, TecDAX, ISIN: DE0005664809) today announced that its research alliance with Boehringer Ingelheim has reached a milestone in September triggering revenues of € 2.0 m to Evotec. The milestone was for the transition of an oncology molecule into Phase I clinical trials.

Dr Mario Polywka, Chief Operating Officer of Evotec, commented: "This is a very important 19th milestone for Evotec in our collaboration with Boehringer Ingelheim, as it represents the first oncology compound to progress into FiM ("First-in-Man") studies. The collaboration continues to drive value for both companies."

ABOUT THE EVOTEC & BOEHRINGER INGELHEIM ALLIANCE

In 2004, Evotec entered into a multi-year, multi-target drug discovery alliance with Boehringer Ingelheim to jointly identify and develop pre-clinical development candidates for the treatment of various disease areas including CNS, inflammation, cardiometabolic and respiratory diseases. In 2009, the collaboration was extended for an additional four years and the scope expanded to include oncology targets. Under the terms of the agreement, Boehringer Ingelheim has full ownership and global responsibility for clinical development, manufacturing and commercialisation of the compounds identified. In return, Evotec receives ongoing research payments and pre-clinical milestones. Furthermore, the contract provides substantial long-term upside for Evotec through potential payments for successful milestone achievements during clinical development and royalties when new drugs reach the market.

ABOUT EVOTEC AG

Evotec is a drug discovery alliance and development partnership company focused on rapidly progressing innovative product approaches with leading pharmaceutical and biotechnology companies. We operate worldwide providing the highest quality stand-alone and integrated drug discovery solutions, covering all activities from target-to-clinic. The Company has established a unique position by assembling top-class scientific experts and integrating state-of-the-art technologies as well as substantial experience and expertise in key therapeutic areas including neuroscience, pain, metabolic diseases as well as oncology and inflammation. Evotec has long-term discovery alliances with partners including Bayer, Boehringer Ingelheim, CHDI, Genentech, Janssen Pharmaceuticals, MedImmune/AstraZeneca and Ono Pharmaceutical. In addition, the Company has existing development partnerships and product candidates both in clinical and pre-clinical development. These include partnerships with Boehringer Ingelheim, MedImmune and Andromeda (Teva) in the field of diabetes, with Janssen Pharmaceuticals in the field of depression and with Roche in the field of Alzheimer's disease.
