Action Plan 2016 – Gaining Momentum

Highlights Q3 2012

Group revenues +8% to €64.2 m, positive operating result YTD and in Q3

EVT Execute:

- 1 • Multi-year compound management agreement with NIH, value of up to €60 m
- Contract extension with CHDI; worth up to US\$ 41 m in research payments*

EVT Integrate:

- 2 • Good progress in ongoing discovery alliances highlighted by recent milestone achievements with Boehringer Ingelheim and Novartis
- Five-year, multi-target collaboration with Bayer to fight Endometriosis* (targets provided by Bayer)

EVT Innovate:

- 3 • **CureBeta**, a collaboration between Evotec and Harvard University enters strategic alliance with Janssen Pharmaceuticals
- DiaPep277 completed patient recruitment in its Phase III clinical trial in Diabetes Type 1
- Roche starts Phase II clinical trial with EVT 302 in Alzheimer's disease
- Strategic advisory agreement with Aspireo to partner Somatoprim
- Five-year, multi-target collaboration with Bayer to fight Endometriosis* (targets provided by Evotec)

Agenda

- Highlights Q3 2012
- **Action Plan 2016 – Innovation Efficiency**
 - EVT Execute
 - EVT Integrate
 - EVT Innovate
- Financial performance & growth outlook

3 EVT Innovate

- **Product *Development* Partnerships and *Cure X* Initiatives**
- First-in-class discovery and product developments
- Investments for upfronts, higher milestones and higher royalties

2 EVT Integrate

- **Integrated drug discovery alliances on partner targets**
- Best-in-class integrated drug discovery projects
- Risk-shared performance-based alliances with research fees, milestones and royalties

1 EVT Execute

- **Stand-alone screening, medicinal chemistry, compound management, compound profiling, ...**
- Highest quality solution tools and processes
- No risk exposure, lower margin, but long-term repeat business and built up of infrastructure

Broad stand alone execution business

Comprehensive Drug Discovery Platform – “EVO Apps”

 Compound Management	 High Throughput Screening	 Protein Production Structural Biology
 Target Deconvolution Compound Profiling	 <i>In vitro</i> and <i>in vivo</i> Pharmacology	 Computational and Medicinal Chemistry

Project management & processes deliver up to 30% faster execution

30% cost reduction versus pharma internal costs – accessed on a variable basis

Highest quality outsourcing services

EVT Execute – Major milestones and actions for H2

- 1** Improved gross margins in core activities such as protein production, counter screening, *in vitro* pharmacology
- 2** Major contract won with NIH in compound management
- 3** Three-year extension of CHDI contract¹
- 4** Expansion of EVT Execute capabilities strengthen risk shared initiatives

“Faster to Decisions“ Integrate business model aligns incentives of both parties

Examples of integrated alliances

Milestones and royalties create significant long-term upside

Illustrative

Building an even stronger portfolio of upside opportunities

EVT Integrate – Major milestones and actions for H2

- 1 Expansion of portfolio with strategic multi-target alliance (Bayer)**
- 2 Further milestone achievements in ongoing alliances, e.g. with Boehringer Ingelheim, Novartis**
- 3 Expansion of customer reach to even more biotech, mid-sized and large pharma customers**

Integrated discovery agreement with Bayer

Long-term potential from early assets and pain expertise

About the collaboration

- Five-year, multi-target collaboration with Bayer
- Focused on novel treatments for endometriosis
- Goal of developing three clinical candidates

Deal terms

- Upfront payment of € 12 m
- Potential preclinical, clinical and sales milestones of up to approximately € 580 m
- Potential royalties of up to low double-digit percent

Development

- Both parties contribute innovative drug targets and high quality technology infrastructures
- Share the responsibility for pre-clinical research characterisation of potential clinical candidates
- Bayer is responsible for all clinical development

Driving value through commercial network

Aspireo agreement

About the collaboration

- Strategic advisory agreement
- Support development and partnering of Aspireo's Somatoprim

Deal terms

- Advisory fees and participation in economic success of Somatoprim

Development

- Somatoprim (DG3173) is a new molecular entity somatostatin analogue
- Unique, potentially best-in-class, pharmacological profile
- Possible indications include acromegaly, carcinoid tumours, and Cushing's disease
- Somatoprim is currently in phase I of clinical development

Enhancing the scope of the pharmaceutical portfolio

EVT Innovate and EVT Integrate - early assets

Outlook and next steps for 2012 ff

Key milestones for 2012

1 EVT Execute

- Double digit revenue growth 2012 - 2016
- Expansion success of existing alliances
- Significant long-term deals with major pharma

2 EVT Integrate

- At least 2 significant new integrated technology/disease alliances (Bayer)
- Deliver significant and accelerated pre-clinical/clinical milestones
- Show operational synergies of recent acquisitions
- Expand offering into larger molecules offering (e.g. Antibodies)

3 EVT Innovate

- At least 1 strategic deal for early assets
- Commercialise innovation (e.g. Cure X, ...)
- Phase III data in DiaPep277 and Phase II start within AD product development partnership
