Evotec Earns Milestone in Oncology Programme as Part of its Research Alliance with Boehringer Ingelheim

Hamburg, Germany – 17 June 2010: Evotec AG (Frankfurt Stock Exchange: EVT, TecDAX) today announced that it has achieved a milestone as part of its research alliance with Boehringer Ingelheim and will receive a payment of EUR 2.5 million. The milestone was achieved for the selection of a candidate compound for pre-development studies in an oncology programme.

Dr Werner Lanthaler, Chief Executive Officer of Evotec commented: "We are particularly pleased about achieving this milestone in the oncology programme, as the alliance was only expanded to this therapeutic area in late 2009. We are very proud of the high value we continue to bring to Boehringer Ingelheim's research efforts and the ongoing fruitful relationship between the research teams from both companies."

ABOUT THE EVOTEC & BOEHRINGER INGELHEIM ALLIANCE

In 2004, Evotec entered into a multi-year, multi-target drug discovery alliance with Boehringer Ingelheim to jointly identify and develop preclinical development candidates for the treatment of various disease areas including CNS, inflammation, cardiometabolic and respiratory diseases. In 2009, the collaboration was extended for an additional four years and the scope expanded to include oncology targets. Under the terms of the agreement, Boehringer Ingelheim has full ownership and global responsibility for clinical development, manufacturing and commercialisation of the compounds identified. In return, Evotec receives ongoing research payments and preclinical milestones. Furthermore, the contract provides substantial long-term upside for Evotec through potential payments for successful milestone achievements during clinical development and royalties when new drugs reach the market.

ABOUT EVOTEC AG

Evotec is a leader in the discovery and development of novel small molecule drugs with operational sites in Europe and Asia. The Company has built substantial drug discovery expertise and an industrialised platform that can drive new innovative small molecule compounds into the clinic. In addition, Evotec has built a deep internal knowledge base in the treatment of diseases related to neuroscience, pain, oncology and inflammation. Leveraging these skills and expertise the Company intends to develop best-in-class differentiated therapeutics and deliver superior science-driven discovery alliances with pharmaceutical and biotechnology companies. Evotec has long-term discovery alliances with partners including Boehringer Ingelheim, CHDI, Genentech, Novartis, Ono Pharmaceutical and Roche. Evotec has product candidates in clinical development and a series of preclinical compounds and development partnerships, including for example a strategic alliance with Roche for the EVT 100 compound family, subtype selective NMDA receptor antagonists for use in treatment-resistant depression. FORWARD-LOOKING STATEMENTS: Information set forth in this press release contains forward-looking statements, which involve a number of risks and uncertainties. Such forward-looking statements include, but are not limited to, statements about our 2010 financial outlook and our expected financial results in future quarters, our ability to deliver on our liquidity guidance, our belief that we are on course to profitability in 2012, our expectations and assumptions concerning regulatory, clinical and business strategies, the progress of our clinical development programmes and timing of the commencement and results of our clinical trials, strategic collaborations and management's plans, objectives and strategies. These statements are neither promises nor guarantees, but are subject to a variety of risks and uncertainties, many of which are beyond our control, and which could cause actual results to differ materially from those contemplated in these forward-looking statements. In particular, the risks and uncertainties include, among other things; risks that product candidates may fail in the clinic or may not be successfully marketed or manufactured; the risk that we will not achieve the anticipated benefits of our collaborations, partnerships and acquisitions in the timeframes expected, or at all; risks relating to our ability to advance the development of product candidates currently in the pipeline or in clinical trials; our inability to further identify, develop and achieve commercial success for new products and technologies; the risk that competing products may be more successful; our inability to interest potential partners in our technologies and products; our inability to achieve commercial success for our products and technologies; our inability to protect our intellectual property and the cost of enforcing or defending our intellectual property rights; our failure to comply with regulations relating to our products and product candidates, including FDA requirements; the risk that the FDA may interpret the results of our studies differently than we have; the risk that clinical trials may not result in marketable products; the risk that we may be unable to successfully secure regulatory approval of and market our drug candidates; and risks of new, changing and competitive technologies and regulations in the U.S. and internationally. The list of risks above is not exhaustive. Our most recent Annual Report on Form 20-F, filed with the Securities and Exchange Commission, and other documents filed with, or furnished to the Securities and Exchange Commission, contain additional factors that could impact our businesses and financial performance. We expressly disclaim any obligation or undertaking to release publicly any updates or revisions to any such statements to reflect any change in our expectations or any change in events, conditions or circumstances on which any such statement is based.
